Personal Projects

Bicycle - [Live Site](#) | [Client Code](#) | [Server Code](#)

Technologies : React Js, Bootstrap, Node Js, Node Express, MongoDB, Firebase, Material UI, Heroku.

- The Admin panel is controlled by admin. An admin can make a user to admin.
- Private router is used on this website. So the user must login first.
- Users can order bicycles and manage their order.

Getaway-tourism - [Live Site](#) | [Client Code](#) | [Server Code](#)

Technologies : React Js, Node Js, Bootstrap, React Hook Form, MongoDB, Firebase

- Book destination by pick up offer button then its show order section.
- User and Admin are same access available in this site
- Some services show on the home page and others show in total services..

Medi-Plus - [Live Site](#) | [Github Code](#)

Technologies : React Js, Node Js, Bootstrap

- Users can login with google and he/she's name shows on display.
- Users can easily use this site because it's a one page website .
- All service shows on the home page. So users can easily select their service.
